

CHARLES CARBONNEAU, Engr.

Chief Engineer

charlescarbonneau@damotech.com

450-979-6620 or 1-877-990-3266

SPEAKER BIO

Charles is a structural engineer (Ph.D.) with more than 20 years of experience in structural dynamics. As Chief Engineer, he oversees all of Damotech's engineering services. Charles participated in the elaboration of our software platform.

He previously worked as Technical Director of Graitec Canada (formerly CivilDesign), the company behind Advance Design America (formerly VisualDesign), an advanced structural analysis and design software for buildings, towers, racking and bridges, in steel, concrete or wood.

Charles is renowned for the depth of his knowledge, his sense of organization and his dedication to finding innovative solutions. He is also a wonderful mentor to his team.

EXPERTISE

- Engineering
- Behavior of racking systems
- Pallet rack safety & inspections
- Training your workforce on safety
