About Damotech

Safeguard your warehouse with Damotech, North America's most trusted rack safety partner.

For over 35 years, Damotech has been the leading provider of comprehensive rack safety solutions for warehouses. Trusted by over half of the Fortune 500, our expertise ensures a safer, more efficient workplace for your employees and operations.

Damotech goes beyond just being a rack safety company. We're your one-stop shop for creating a safety culture in your warehouse.

Safety First

Damotech is a group of experts and engineers who answer your calls, design and build innovative products, and install them with precision and care. We passionately work day in, day out, toward greater warehouse safety and performance. Whether you operate a warehouse or oversee multiple distribution centers, our goal is to help you better manage your pallet racking systems safely.

RACK ENGINEERING SERVICES

Damotech's in-house engineers are among the most knowledgeable in the industry. We offer expert engineering services focused exclusively on industrial racking systems and their safety.

WAREHOUSE AND RACK PROTECTION

Damotech offers top-tier damage prevention products for your pallet racking systems and your other valuable warehouse assets. Don't settle for plastic alternatives—choose the unmatched strength and reliability of our heavy-duty steel guards.

PALLET RACK REPAIR SOLUTIONS

Permanently fix damaged racking and protect against future impacts while restoring original load capacity with Damotech's engineered rack repair kits. We aim to put a stop to the endless cycle of upright replacements with built-to-measure units designed to meet your specific needs.

RACK SAFETY SOFTWARE

Damotech is the only company in the industry to offer a software platform that manages your rack inspections, load capacities, and maintenance. Accessible through the cloud, the Damotech Platform makes it easier than ever to track your progress toward a safer warehouse.

Engineering Services

Regardless of the industry, the type of pallet racks you own or the kind of issues that are prevalent in your warehouse, Damotech engineers have the expertise and knowledge to diagnose, report, and help you act on them.

RACK SAFETY INSPECTIONS

Damotech engineers will inspect your entire facility for any rack issues or damage. They will also certify that your systems comply with local codes and standards (RMI, OSHA, CSA, ANSI, etc.).

LOAD CAPACITY CALCULATIONS

Damotech engineers will collect detailed on-site data and measurements about your racking systems, calculate their load capacities, and issue a stamped load capacity report with drawings and labels or plaques.

RACK SAFETY TRAINING

Our courses are designed to improve pallet rack safety by educating your workers on the proper course of action when rack safety issues arise. Training sessions can be delivered via videoconference, e-learning, or at your facility.

RACK SAFETY REGULATIONS

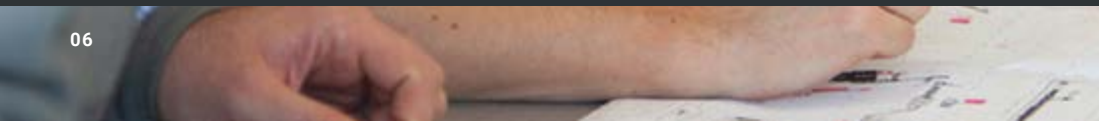

Damotech has the expertise to simplify the regulatory compliance process, offering services such as third-party rack safety audits, OSHA compliance support, and engineer-stamped drawings with load capacities.

The Experts

Damotech's engineers are the most knowledgeable in the racking industry. Their expertise has been honed through a rigorous internal training program that equips them with the most up-to-date knowledge and industry best practices.

Our engineers go beyond basic checks, meticulously examining your racks for even subtle signs of damage. Their expertise allows them to predict how damage might compound over time, preventing potential catastrophes.

From compliance inspections to load capacity calculations and safety training, we tailor our services to your needs while upholding the highest standards. Working with Damotech engineers gives you peace of mind thanks to their unmatched knowledge, specialization, and dedication.

Rack Inspections

WHY INSPECT

Despite the demands of your daily operations, it's critical that your racking systems maintain their full integrity over time. In the U.S. and Canada, laws and guidelines stipulate that company management is responsible for providing a safe workplace for their employees. Putting workers at risk of injury can expose employers to serious liability in case of an accident.

THE SERVICE

Our engineers walk the facility and inspect the racking systems for compliance by collecting data and pictures and recording any deficiencies, damages, or missing components. A stamped report is issued with specific and actionable recommendations on maintenance.

When to Inspect Your Pallet Racking?

While annual rack inspections by a third-party are essential regardless of industry, rack type, or common warehouse issues, rack inspections should occur on a regular basis, and especially in the following situations:

NEW RACK INSTALLATION

Whether it's your entire warehouse or a small section, a brand-new installation calls for a third-party to verify that everything was installed according to engineering specifications and that the rack systems are ready to be put to safe use.

REGULATORY COMPLIANCE REVIEW

Some jurisdictions require an official document stating that racks have been rated, inspected, and are safe to use. For instance, Ontario requires a PSR (Pre-Start Health and Safety Review) signed by an engineer.

CORPORATE SAFETY INITIATIVE

When launching a corporate-wide safety program, you want a baseline inspection performed to assess the condition of the racks at a specific point in time, and to be able to measure your progress toward a safer warehouse environment or compare between your facilities.

REPAIR OR REPLACEMENT

If your damaged rack was fixed with parts from the original equipment manufacturer (OEM) or a specialized rack repair kit, you may want to ensure that the rack still meets the original specifications and maintains its rated load capacity.

TIMELY RE-ASSESSMENT

An annual, quarterly, or monthly re-assessment of your racks should occur after a baseline inspection has already been conducted. New damage may have occurred. Updating the status of previously reported issues will give a more accurate measure of performance.

RECONFIGURATION REVIEW

Have you changed the layout of your racking systems or changed the height of certain beams? Inspections and load capacity calculations, including updated Load Application and Rack Configuration (LARC) drawings, are required before putting the racking back into service.

Load Capacity Calculations

Knowing and displaying your pallet rack load capacities, as well as having load application and rack configuration (LARC) drawings on hand, are both critical to the safe operation of your warehouse. All our load capacity calculation mandates are in conformance with North American rack design specifications.

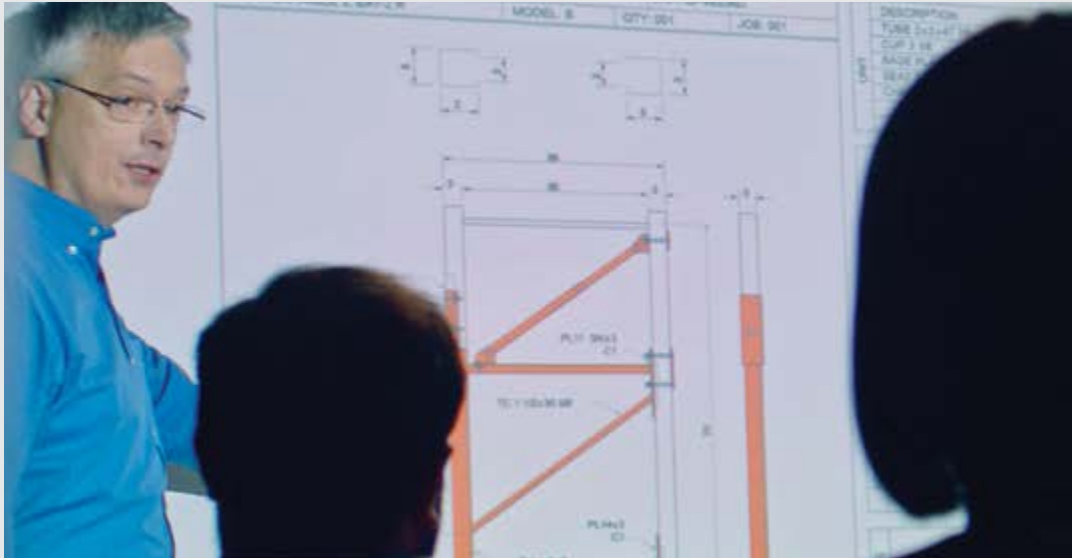

THE REPORT INCLUDES:

- ✓ Warehouse layout
- ✓ Load capacity labels
- ✓ Appendix report detailing column styles, beam configurations, beam levels, and maximum pallet weight capacity

All load capacity calculation mandates include plastic adhesive labels stating the load capacity of each bay. When pallet beam configuration and load capacity are uniform, end-of-aisle plaques can be produced.

Rack Safety Training

Damotech's training programs equip your team with the knowledge and skills to maintain a secure and efficient warehouse environment. You'll also gain access to a well-structured rack safety program blueprint that outlines practical steps to elevate your warehouse safety.

WHY CHOOSE DAMOTECH'S TRAINING PROGRAM

Expert Guidance

Our trainers are certified professional engineers with extensive experience in racking systems and safety protocols.

Comprehensive Curriculum

Our training covers various topics, including rack protection, issue recognition, safety standards, and inspection best practices.

Blueprint for Rack Safety

Obtain a structured rack safety program blueprint and discover actionable steps to enhance your warehouse safety.

Hands-On Learning

Our training programs are available across North America. We provide all the tools and documentation your team needs, readily accessible for future reference.

LIVE ONLINE WEBINAR TRAINING

You choose the timing, and our instructors will guide your employees through rack safety awareness and inspection procedures via interactive videoconferencing. This convenient option eliminates travel hassles for your teams spread across multiple states or warehouses.

LIVE ON-SITE IN-PERSON TRAINING

Our engineers will travel to your warehouse anywhere in North America to train your staff in person on rack safety and the procedures for carrying out routine rack inspections. This rack safety course consists of two segments: an instructor-led classroom session and a hands-on workshop in your warehouse. We will tailor the presentation according to your warehouse's location and needs.

INTERACTIVE E-LEARNING

Our e-learning platform delivers flexible, on-demand rack safety training that employees can complete at their own pace. Structured into clear learning modules with videos and built-in knowledge checks, it's ideal for onboarding new staff or providing consistent refresher training across multiple facilities. Companies can easily deploy it to large or distributed teams, ensuring standardized rack safety awareness without scheduling constraints.

BENEFITS OF CERTIFIED TRAINING

- **Reduced Risk**
Minimize accidents, injuries, and product losses by identifying and addressing rack damage.
- **Safety Culture**
Training and safety inspections demonstrate dedication to employees' well-being.
- **Cost Savings**
Avoid expensive rack failures, replacements, and insurance costs by recognizing risks early.
- **Confident Team**
Empower your workforce to take proactive safety measures.
- **Increased Efficiency**
Keep your warehouse operations running smoothly with well-maintained racking systems.
- **Safer Workplace**
A safe warehouse reduces stress, likely increasing productivity and retention rates.

DAMAGE PREVENTION
FOR RACK COLUMNS

Rack Protection

DAMO GUARD

DAMO GUARD may seem simple, but looks can be deceiving. It is designed to fit on any rack and prevents damage to front columns. It's a very efficient way to protect the base of your uprights.

Bolted to rack frame —

Guard comes in multiple sizes to fit any rack —

Bent plate
3/16" thick steel makes it very resistant —

Bullnose protects the Hilti Anchor inside against forklift damage, while a foam insert prevents debris from accumulating —

DAMO GUARD XPS

Features a built-in elastomeric insert with integrated quick-locking connectors that install directly into existing rack column punch holes and is securely anchored to the floor to transfer impact energy into the concrete slab.

Rack Protection

DAMO BASE GUARD

A structurally independent rack column protector that guards the bottom portion of columns from outrigger impact while allowing easy floor-level beam installation.

Designed to safeguard the baseplate and its anchors, it can be customized to fit virtually any baseplate style or size – including seismic-rated configurations.

High-strength **steel plate**
for impact resistance

Anchored to the floor with
4 screw-type anchors

**DAMO BASE GUARD
(Round)**
Option available to deviate
forklift outriggers

Bolted-on **back channel**
for easy assembly and
strength

DAMO NOSE GUARD

This column guard provides compact protection against outrigger damage, safeguarding racks from forklift impacts. Made from 3/8" solid steel and standing 4" high, it features an anchor point inside the V-nose for effective impact absorption and superior resistance.

**V-shaped
Front Deflector**
protects frame
post, transferring
impact to floor

A close-up photograph of a welder's gloved hand holding a welding torch, applying heat to a vertical metal pipe. A bright orange flame is visible at the tip of the torch. Above the pipe, a red identification tag with the number '3123' is hanging. The background is a hazy, industrial setting with warm, yellowish light.

QUALITY BUILT

Rack Protection

DAMO FRAME GUARD

This heavy-gauge rack guard provides robust protection for dock door rack frames, shielding them on both sides from damage caused by forklifts, pallet jacks, and debris. Crafted from 1/2" thick steel plate for exceptional durability, this guard is securely anchored to the floor using 7" floor anchors, ensuring maximum strength and rigidity.

V-nose front
protector shields the
front frame post —

DAMO AISLE GUARD

Heavy-duty rack protection designed to safeguard your end-of-row and tunnel rack frames. It features a 12" tall, 1/2" thick front deflector to shield front frame posts from impact damage, along with side angles to protect side and rear posts.

Standard – Rounded Deflector

Acts as a durable barrier to ensure structural integrity for pallet racks in high-traffic areas.

VNA Option – Formed Deflector

Offers robust protection for pallet racking systems in Very Narrow Aisle (VNA) configurations.

DAMO END GUARD

Strategically placed at the end of aisles, this floor-level rack guard provides essential protection for pallet rack systems from accidental forklift impact. It is adaptive in length, made of 3/8" thick angle iron, and reinforced with stiffeners to ensure maximum durability and impact resistance.

Heavy-duty steel,
securely anchored
for maximum
impact resistance

HEAVY-DUTY PROTECTION FOR YOUR WAREHOUSE

DAMO SHIELD is structurally independent and is designed to protect building columns from forklift impact.

Warehouse Protection

DAMO SHIELD

Heavy-duty protection for warehouse building columns. The only solution that does not rely on the building column or make contact with it in the event of an impact. Made of two 1/4" structural steel half moons with a minimal footprint, it's anchored to the floor with eight heavy-duty 5 1/2" Hilti screw-type anchors; it will stay put.

Sizes:

- Width: 20" (standard) or 30" (XL)
- Height: 36" high or 8" low profile

Options:

- Fork Blocker (for 36" height version only)
- 6" to 12" extensions to accommodate larger columns

Standard height 36"

Rounded shape
minimizes footprint
and prevents direct
corner impact

1/4" thick
structural steel
makes it ultra
resistant

Optional
Fork Blocker

8 heavy-duty
Hilti Anchors
solidly ground
the unit to the floor

DAMO SHIELD (Low Profile)

The 8" low-profile version
delivers durable, cost-effective
floor-level protection against
forklift blade and outrigger
damage.

Warehouse Protection

DAMO FENCE

This welded heavy-duty fence is used in critical high-traffic areas where maximum protection is needed.

DAMO FENCE
(STANDARD BASE
PLATE ANGLE)

Optional
Fork Blocking Plate
12" high and 5/16"
thick steel plate added to
protect warehouse workers or
equipment at 6" to 18" level

1/4" thick **structural steel**
tubing for maximum
impact resistance

3/8" **thick steel**
base plate angle

DAMO BOLLARD

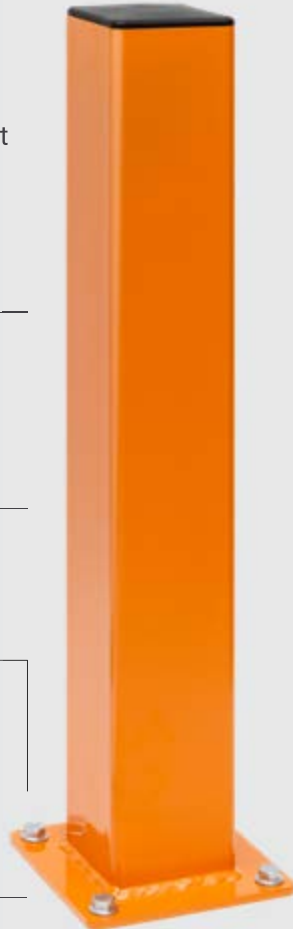

This heavy-duty steel bollard is designed to protect against vehicle impacts and prevent costly damage in high-traffic areas.

Overall height 42" —

1/4" thick, 6" × 6"
structural steel post —

Four removable 5/8"
Hilti screw-type anchors —

3/8" thick, 10" × 10"
reinforced baseplate —

DAMO BOLLARD

Protects building infrastructure and critical mechanical components, such as loading dock door frames, from vehicle impact damage.

Rack Repair

DAMO PRO

This is the engineered rack repair kit that started it all. Built to permanently repair damaged columns, it comes with a **lifetime warranty** against impact, is designed to fit on any type of racking system and can accommodate multiple levels of beams. It also follows the original configuration of the rack while restoring its original load capacity.

SINGLE LEG KIT

This engineered solution repairs and protects a single front or rear column without altering the rest of the rack upright.

Cup adapted to fit any type of rack

Post made of 1/4" thick hollow structural steel makes it virtually indestructible

Combination of front and rear **anchors**. **Bullnose** protects the front anchor against damage

Diagonal brace follows the original configuration of the rack

Choice of **extended** or **seismic footplate** and **no-bullnose** option on all units

Grade 5 - 1/2" **bolts** safely secure the unit to the rack

Horizontal brace made of HSS steel for added impact resistance

DAMO PRO Configurations & Options

DOUBLE LEG KIT

Permanently repairs **front and rear columns** and protects the rack's lower section from future impacts.

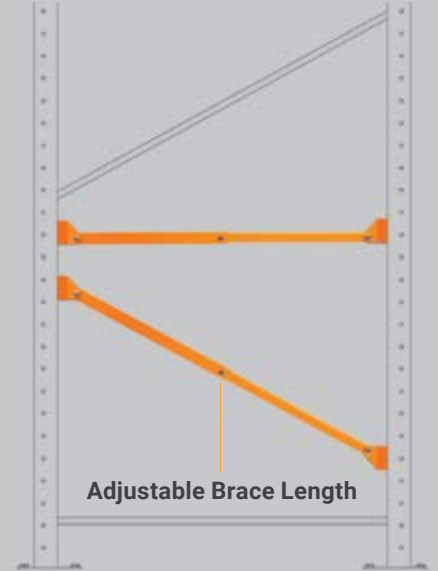

SLANT KIT

Designed to permanently repair and protect **slanted** front and/or back legs of a racking system.

DEFLEX PLATE

This **plate option** offers extra protection to uprights from side impacts and abuse in drive-in tunnels and is essential in end-of-aisle applications.

DAMO BRACE

This adjustable brace repair kit replaces missing or damaged horizontal and diagonal braces. It maintains the original configuration of the rack.

Rack Repair

DAMO FLEX

A versatile solution for the repair and reinforcement of damaged front and/or rear columns. Adjustable in depth, it comes with a **10-year warranty** against manufacturing defects and is designed to fit on any racking system. It can accommodate multiple levels of beams and respects the original rack configuration and load capacity.

Cup adapted to fit any type of rack

Front post made of 3/16" thick hollow structural steel, which makes it highly resistant

Combination of new front and rear **anchors**. **Bullnose** protects the front anchor against damage

Diagonal brace adjustable for flexible installation

Grade 5 - 1/2" **bolts** safely secure the unit to the rack

DOUBLE LEG KIT

DAMO ADVANTAGE

This repair kit was specifically designed for convenience and flexibility. It is manufactured to match your OEM's column punch style, allowing for effortless reattachment of existing beams. The standard and non-protruding versions feature internal reinforcement and are ideal for very narrow aisle (VNA) configurations as they do not protrude within the aisle.

U.S. availability only.

Bolted cup for easy installation; no welding required

OEM Punch Style replicated for easy beam attachment

The front post is reinforced with a backer channel for added strength

Oversized footplate made of 3/8" steel, offering new anchor points

STANDARD

DAMO ADVANTAGE (Deflector)

Engineered Repair Kits

Permanent Repairs

Fix damaged racking for good, eliminating the need for repeated replacements.

Impact Protection

Protect racking against future forklift impacts, extending its lifespan.

Load Capacity Restoration

Restore the original load capacity and stability of the racking system.

Customizable Solutions

Tailored to fit any rack type and size.

Cost Efficiency

Reduce costs and shipping delays compared to frequent upright replacements.

Minimal Downtime

Installed quickly with minimal disruption to warehouse operations.

Turnkey Installation Management Services

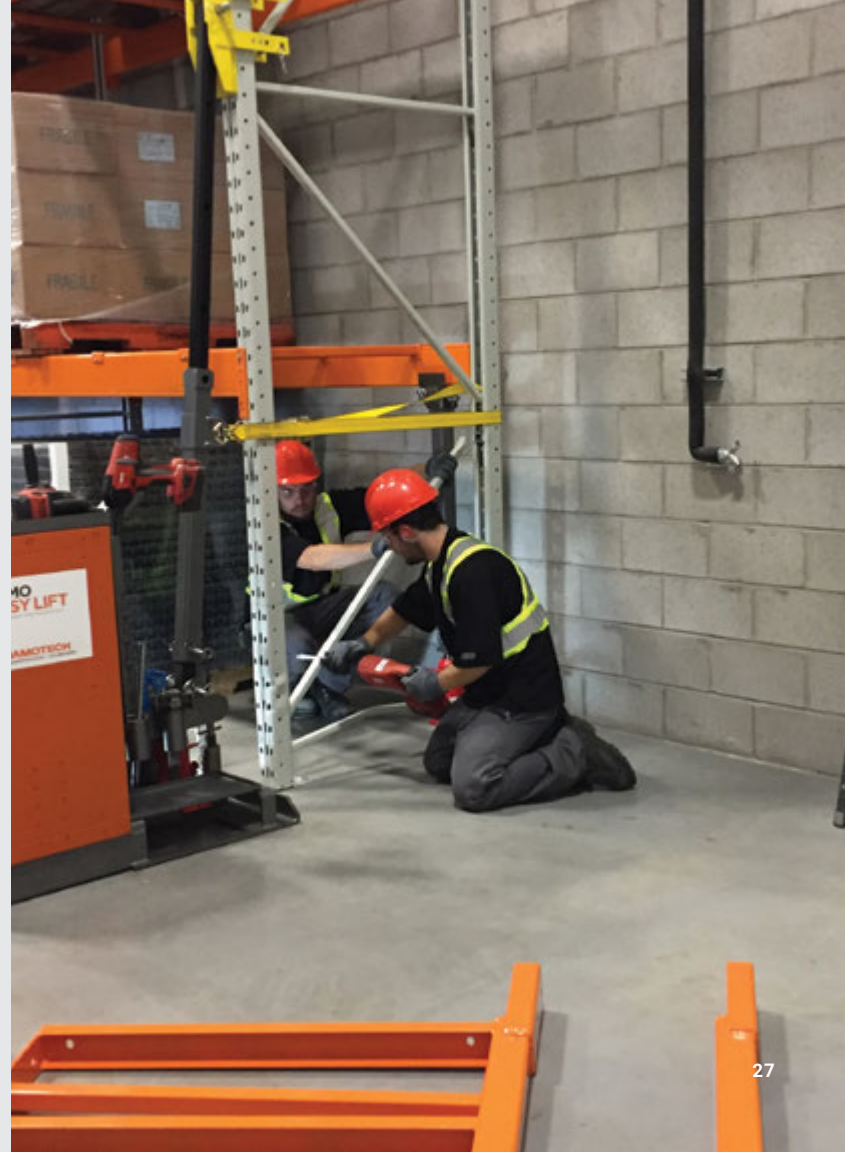

Damotech provides professional installation for rack repair and protection products across the U.S. and Canada. Our certified technicians ensure safe, compliant, and efficient installations with minimal disruption to your warehouse.

CERTIFIED SPECIALISTS

Our teams follow strict safety protocols and deliver consistent, high-quality work, backed by annual training and rigorous oversight.

WHY IT MATTERS

- Fast, efficient installations
- Minimal downtime; little to no unloading
- Safe, code-compliant work
- North American coverage
- End-to-end project coordination

Software

The Damotech Platform is the only offering of its kind in the industry. It helps warehouse operators optimize their racking assets by giving them real-time access to rack inspection reports and load capacities. Accessible through the cloud, it's never been easier to track your progress toward a safer warehouse.

GO MOBILE WITH THE APP!

Conduct rack damage assessments with the Damotech mobile app for tablets and smartphones. You can access all of the platform's real-time data tracking and analysis.

PLAN VIEW

Get a bird's-eye view of your warehouse, capturing varying load capacities with color-coding.

ISSUE TRACKING

Report and monitor issues by warehouse location, rack issue type, rack component, or priority level.

LOAD CAPACITY

Review and analyze the capacity of your racking systems to optimize workflows for efficiency.

Damotech Platform Benefits

MANAGE MULTIPLE LOCATIONS

It has never been easier to manage and stay up-to-date with multi-warehouse environments. Simply log in, and all the data is at your fingertips.

UNIQUE SOLUTION

The Damotech Platform is the only dedicated rack inspection software that enables you to manage your rack assets, track your progress, and achieve a safer environment.

EASY TO USE

Although powerful, the Damotech Platform was designed to be intuitive and easy to learn.

GRAPHIC VIEWER

From warehouse layouts to dashboards and photos of deficiencies, everything is graphically presented for easy viewing.

IN THE CLOUD

The software and all of your data are hosted in a secure cloud environment. This means you always have the latest version of everything that you can access from anywhere, at any time.

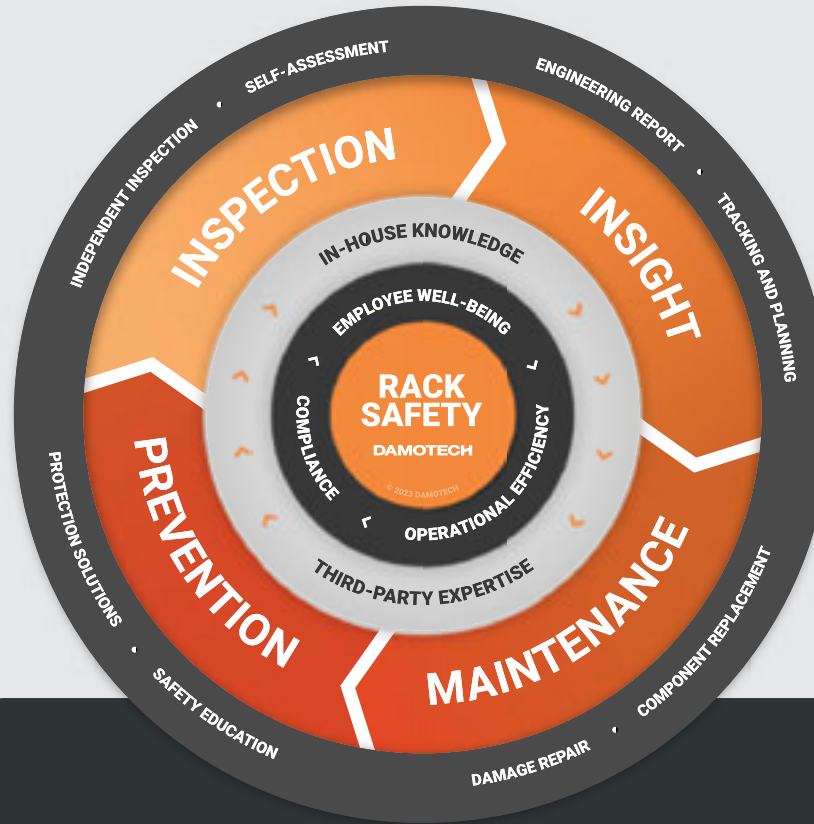

TRACK YOUR PROGRESS

Stop using paper and Excel to track your deficiencies and repairs. Access and store data from your latest inspection to easily view which deficiencies need attention.

Rack Safety Program Flywheel

Drawing from Damotech's 35+ years of industry experience, the Rack Safety Flywheel is designed as a structured approach to help warehouse managers create and uphold a strong warehouse safety program.

KEY COMPONENTS OF A RACK SAFETY PROGRAM

- Acquire rack safety knowledge
- Inspect pallet racks
- Use racking insight and plan work
- Repair and maintain pallet racks
- Prevent warehouse damage
- Train employees

Why Implement a Rack Safety Program?

Giving priority to rack safety can have a positive impact on your company's bottom line. Follow the structured approach suggested by the Rack Safety Flywheel to:

- Increase employee well-being
- Comply with regulations
- Enhance company reputation
- Cultivate a lasting safety culture
- Improve operational efficiency
- Reduce insurance costs

A warehouse rack safety program refers to the systematic implementation of measures and protocols aimed at ensuring the secure and accident-free storage of goods on racks. It involves the careful assessment, maintenance, and adherence to safety standards and guidelines, as well as the training and education of personnel to minimize the risk of accidents, injuries, and damage to both stored items and employees.

10 ways Damotech's experts can help with rack safety

- 01 Offer engineering expertise and rack safety experience.
- 02 Identify potential hazards that may have been overlooked.
- 03 Assess a company's specific needs.
- 04 Offer a new perspective and optimize safety in the warehouse.
- 05 Guide warehouse operators and workers on industry best practices.
- 06 Ensure compliance with standards and regulations.
- 07 Create a customized strategic rack safety program.
- 08 Give support to keep the program effective and up to date.
- 09 Provide engineered products, safety training, and maintenance software.
- 10 Propose specific solutions to address common issues.

DAMO CARE

Your Rack Safety Program, Managed by Damotech.

Built on our innovative Rack Safety Flywheel, DAMO CARE is a subscription-based service that simplifies and streamlines your company-wide rack safety program. We provide expert engineering guidance to ensure your program meets industry standards, safeguarding your workers and valuable assets.

With DAMO CARE, you gain peace of mind knowing your racks are safe and compliant. Eliminate the worry of potential rack failures and focus on running your business with confidence.

Check with your Damotech representative for availability in your area.

- Pallet rack safety training
- Rack repair solutions
- Rack & warehouse protection solutions
- Rack safety software

Why Damotech?

Whether you are looking for a rack inspection, employee training, or rack repair and protection products, we have the expertise to help. By partnering with us, you will have access to all our services and products in one place.

Rack Expertise

Our experts specialize in pallet racking. From engineering to inspections and repairs, we bring deep, hands-on expertise to every warehouse we support.

35+ Years Experience

As the recognized leader in rack safety in North America, we've seen it all: no rack issue is too complex or unimportant.

North American Coverage

Our network of engineers, installers, and dealer partners spans the U.S. and Canada, ensuring consistent service and support no matter how many warehouses you operate.

Best-in-Class Warranty

Damotech's DAMO PRO offers the strongest warranty in the industry, giving you long-term confidence that it will keep performing year after year.

Heavy-Duty Steel Products

Built from high-strength, structural-grade steel, our repair and protection products are designed to withstand forklift impacts and deliver lasting value.

A True Safety Partner

We go beyond products, helping you build a safer warehouse through engineering guidance, training, and the tools to maintain a long-term rack safety program.

Damotech Takes Action

Minimizing Our Environmental Footprint

- LEED-certified headquarters and manufacturing facility.
- Sustainable rack repair solutions reduce waste.
- Electrostatic powder coating to eliminate VOC emissions.
- Paperless operations to minimize paper usage.
- Water-free manufacturing to eliminate wastewater discharge.

“Safely managing storage rack systems across a network of warehouses can become overwhelming.

With Damotech, we have found an industry partner for education, engineering support, repairs and protection. Their quality and customer service are first-class.”

Pehr Peterson
Director of Construction
& Asset Management

Over half of the Fortune 500 trusts Damotech for the safety of their racking systems.
