ELITE: SUPER HEAVY DUTY

RACK REPAIR KITS

ELITE Slant Single Leg Repair

The ELITE Slant Single Leg Pallet Rack Upright Repair Kit reduces future rack damage in high impact areas by moving the front lower rack leg nine inches behind the original location. This offset increases aisle width and distance to outrigger impact.

Fully bolted, this engineered repair kit exceeds 50,000 lbs. of impact force up to 12" high. Designed to repair a damaged slanted front frame post with an undamaged rear post. Within kit height, replaces OEM struts. Available in all frame depths and kit heights over 2'0". Repair kit comes standard with no front deflector. "V"-Nose deflector or non-protruding deflector plate is optional.
